3 E. Alumni Avenue

Kingston, RI 02881

This event is part of a three-year USDA/Northeast SARE Research & Education Project entitled *Cover Cropping Strategies for Year-Round Weed Control on Mixed Vegetable Farms in Southern New England* led by University of Rhode Island professor Rebecca Brown.

Featured presenters for the workshop include:

Brian Caldwell (Cornell University and Hemlock Grove Farm) will share results and insights from Cornell's Organic Cropping Systems Project and from his own farm

Seth Kroeck (Crystal Spring Farm) will present his scheme for integrating covers crops and rotation on his mixed vegetable farm, along with recent livestock experimentation.

Jeff Pieper (University of Rhode Island) will describe vegetable crop research he conducted using cover crops for weed suppression, living mulch, and undersowing.

Pesticide credits available.

Upcoming Events in this Series:

April 9, 2013: Twilight Meeting at the University of Rhode Island Agronomy Farm, 4-7pm

“High Tunnel Vegetables for Early Spring Sales”
